Ideation Phase

Brainstorm & Idea Prioritization Template

Date	Team ID	Project Name	Maximum Marks
25 February 2026	GACSE-145	AI Financial Advisor	4 Marks

Team Members:

• Kushwaha Rajat Kamalakant (Leader)

• Dev Kumar

• Kartikey Singh

• Harsh Chaudhary

Project ID: GACSE-145

Project Name: AI Financial Advisor

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Meeting Date: 24 February 2026

Attendees: Kushwaha Rajat Kamlakant (Leader), Dev Kumar, Kartikey Singh, Harsh Chaudhary

Problem Statement (Selected):

Many young professionals and students lack access to personalized, trustworthy, and affordable financial advice. They struggle with budgeting, saving, investment choices, and basic tax planning. Our solution: Build an "AI Financial Advisor" that provides personalized budgeting, investment suggestions, portfolio evaluation, goal tracking, and educational explanations using explainable AI models.

Goals for this session:

1. Align on the main problem to be solved.
2. Generate a broad set of ideas that address different parts of personal finance.
3. Prioritize ideas based on impact, feasibility, and alignment with project timeline (hackathon / submission deadline).

Step-2: Brainstorm, Idea Listing and Grouping

Brainstormed Ideas (raw list):

1. Personalized monthly budgeting assistant (automated budgets + alerts)
2. Investment recommender (risk-profile based ETF/Mutual Fund suggestions)
3. Portfolio analyzer (asset allocation, diversification, risk metrics)
4. Automated savings planner with round-up rules
5. Tax-saving suggestions and checklist for salaried individuals
6. Expense categorization using OCR from receipts
7. Chat-based financial Q&A with explainable reasoning
8. Goal-based financial planner (e.g., saving for car, emergency fund)
9. Market news summaries tailored to user's portfolio
10. Retirement projection calculator with Monte Carlo simulation (simplified)

Grouped Ideas (by theme):

A. Budgeting & Saving: 1, 4, 8

B. Investments & Portfolio: 2, 3, 10

C. Automation & Data Capture: 6

D. Guidance & Education: 7, 5, 9

Selected focus for MVP:

• Personalized budgeting assistant (auto-categorization + alerts)

• Investment recommender (basic risk-profile-based suggestions)

• Chat-based financial Q&A (explainable responses)

Reason for selection:

These features provide immediate user value, are feasible within the project time window, and together create a coherent user experience of learning, planning, and action.

Step-3: Idea Prioritization

Prioritization Criteria (each scored 1-5):

• Impact (how much user value)

• Feasibility (development time and resources)

• Novelty (differentiation)

• Alignment with project goals (hackathon/competition requirements)

Scoring Table (example):

Idea	Impact	Feasibility	Novelty	Alignment	Total
Budgeting assistant	5	4	3	5	17
Investment recommender	4	3	4	5	16
Portfolio analyzer	4	2	3	4	13

OCR expense capture	3	2	4	3	12
Tax suggestions	3	2	2	3	10
Chat Q&A	5	3	4	5	17

Final prioritized list (top 3):

1. Budgeting assistant (Total: 17) — MVP core feature
2. Chat-based financial Q&A (Total: 17) — provides immediate user trust and guidance 3. Investment recommender (Total: 16) — add-on for longer-term value

Next steps (for documentation & submission):

• Finalize UI wireframes and screenshots to include in documentation.

• Add brief architecture diagram and technology stack (backend, ML model, database).

• Prepare testing notes and screenshots showing working features.

• Complete README, user manual, and deployment steps for submission.
